D.O.B- 22/07/1994

Languages

English, Hindi

Key-Skills

- K8S (GPU-enabled DGX)
- NVIDIA DCGM, BCM
- Docker, Containerd, Helm
- Jenkins, CI/CD Pipelines
- GitLab-CI, GitLab Runner
- Prometheus, Grafana
- Python, GitBash(RHEL9)
- ML/DL, LlamaModels
- GitHub (Branching, PRs, Protected Branches)
- Prometheus, Grafana, Custom Metrics
- (HPA/VPA), YAML
- NFTs, Web3-Wallets
- Hyperledger Fabric

Dev-Tools

- VStudio, Remix IDE
- Hardhat, Truffle, HLF

Program. Lang.

- Python, C, Solidity, Oops Concepts
- PGSQL, YAML, HTML, Web3.js, Ether.js

Education

- | | | |
|-----------|---|----------------------------------|
| 2019-2021 | M.Tech From NIT DURGAPUR (7.08 CGPA) | Computer Science and Engineering |
| 2012-2016 | B.Tech. From SCRIET, Meerut (7.5 CGPA) | Computer Science and Engineering |
| 2010 | Intermediate From UP Board | S.K.I.C, Allahabad |
| 2008 | High School From UP Board | S.K.I.C, Allahabad |

Experiences

Dec-2023 to Now DevOps Engineer + Blockchain - MicroGenesis Tech Soft Pvt Ltd.

DevOps & Blockchain Engineer with **6 years of total experience** in **GPU-enabled Kubernetes infrastructure, CI/CD automation, deployments, and secure blockchain solutions for Naval Data sync and propagation.** Managing large-scale **offline Kubernetes (RHEL-based)** environments with **docker/containerd, NVIDIA GPU of DGX Machine**, and microservices orchestration for defence-oriented applications of Naval platform.

Designed and automated **CI/CD pipelines** using **GitLab CI/CD** and **Jenkins**, integrated **Prometheus/Grafana monitoring, Hadoop & Spark RAPIDS** workloads with shared **DDN storage** for GPU-accelerated data processing. Contributed to **Hyperledger Fabric** based private blockchain solutions for secure data propagation and synchronization.

Additionally explored with gained hands-on exposure to **GenAI/LLM-based offline AI tools** using **LLaMA + Open-WebUI**, while continuously learning and enhancing skills in **AWS Cloud, Terraform, SRE practices, Datadog observability, Claude AI, and Cross-Chain Blockchain Bridges.**

Oct-22 to Apr-23 Software Developer (Blockchain) | Leeway Hertz Technology

Blockchain Development: Designed, developed, and tested Ethereum-based blockchain solutions using Truffle, Hardhat, and Ganache for local development. Smart Contracts, including NFT platforms (e.g., OpenSea) and token standards (ERC20, ERC721, ERC1155).

Frontend Proficiency: Expertise in frontend interaction using libraries like ether.js and web3.js.

Scalability/Fundraising: Proficient in Ethereum Layer2 solutions and deploying smart contracts on side chains. Hands-on experience with ICO, IPO, and STO processes.

DeFi and DEX: Worked with DeFi platforms like Aave Protocol and Uniswap, managing liquidity, yield farming, token staking, and conducting market analysis using Web3.

AI Expertise: Specialized in Generative AI Development Models.

Sep-21 to Sep-22 Junior Research Engineer | NIT GOA (BLOCKCHAIN Technology)

Blockchain Development with Python: I'm a proficient end-to-end blockchain developer, specializing in core infrastructure using Python. I bring expertise in Ethereum, Smart Contract security, and crypto wallet integration. My deep knowledge spans blockchain protocols, consensus algorithms (PoW, PoS, and PoA), and advanced cryptographic techniques with Merkel Trees, enhancing overall blockchain security and performance.

Aug-16 to Dec-18 L.T Communication Pvt Lt.

Within 2 years as a Python Developer, focusing on backend technologies with MySQL db. Worked on API integration and Skilled in Git, HTML, CSS JScript (ES6), React for web development.

Projects

INSTINCT Games

Developed Ethereum Smart Contracts for NFT tokens and NFT Marketplace contracts. Implemented ERC721 and ERC1155 standards, including buy/sell and deposit/withdraw functions. Utilized Ether.js, Web3.js, MetaMask, and dApps on various test networks. Designed protocol-specific decentralized NFT marketplaces for secure digital asset trading.

Polpappa Crypto Exchange and DeFi

Creation of hack-proof decentralized exchange platforms, integrating Uniswap and Aave protocols. Enablement of digital currency exchange. Contribution to Metaverse development, including NFT marketplace projects.

Redgore InteriorAI and LGPT(Large Language Model Development)

Experienced in AI projects, specializing in models like GPT3.5, DALL.E, Stable Diffusion, Mid-journey, Bard, and LLaMA. Proficient in AI frameworks such as PyTorch and TensorFlow, generative AI model creation, and fine-tuning. Extensive experience with LLM Models including Langchain integration.

Developing Smart Controller for Optimum Utilization of Energy and Trustworthy Management in a Micro Grid Environment(Core Blockchain Development Project)

Focused on Energy Utilization and Management, Distributed Ledger Technology, Smart Contracts, Data Analytic with improves the trust, information immutability, high availability, demand prediction, simplified visualization of energy metering and reporting.

(M.Tech) Work on Thesis- Skin/Scalp Disease Recognition and Human Activity Recognition by using Deep Learning, Triage System by using Machine learning

Achievements

Qualified Gate 2017, 2018, Stood among the top 10 percent of students

Certificates - Got the certificate of HEWLETT- PACKARD EDUCATION SERVICE and certificate of NAV BHARAT INSTITUTE OF TECHNOLOGY for complete C Programme.

Sports Meet - Actively participated in the Cricket& Badminton Championship at college, I was a captain of my b-tech college team, also participated in Several cultural fest in my college like painting, organized events.

Interests

Writing Poems, Dancing, Reading Books, and Social Work.
